Please read the following carefully:-

1. Changes to the law now require all practitioners who manipulate the spine to warn patients of material risks. In extremely rare circumstances, some treatments of the neck may damage a blood vessel and give rise to a stroke or stroke-like symptoms (approx. 1 in 5.85 million) [Neck manipulations. Halderman, et al Spine vol 24-8 1999]. Whilst this has never occurred in this practice, we are still required to warn. If any adjustments (manipulations) are required, you will be tested beforehand, as has always been our practice.
2. Other very slight risks include strain/injury to a ligament or disc in the neck (less than 1 in 139,000) or the low back (1 in 174,000) [Dvorak, J Man Med 1989; 4:7-16].
Chiropractic adjustments of the spine are internationally recognised as being far safer in dealing with neck and low back pain than medication and many other alternatives [A Risk Assessment of Cervical Manipulation, JPMT 1995, Manga Report, Ontario Ministry of Health 1993].
3. I Hereby request and consent to the performance of Chiropractic adjustments, other Chiropractic procedures and if necessary diagnostic x-rays on me by the Chiropractor named below and/or anyone authorised by the same Chiropractor.
4. I further understand and am informed that, as in all health care, there are some slight risks to treatment and do not expect the Chiropractor to be able to anticipate or explain all risks and combinations: and wish to rely on the Chiropractor to exercise judgement during the course or the procedure which the Chiropractor feels at the time based upon facts known, is in my best interest.
5. I further understand that Chiropractic care cannot guarantee resolution of some or all of my ailments.

In addition, we try very hard to accommodate all our patients with suitable days and times for appointments and we therefore ask that you honour these times that have been set aside for you or your child. If an appointment is missed or cancelled within 24 hours before the appointment, a charge of 50% of your scheduled fee will be applied.

The statements made on this form are accurate, to the best of my recollection, and i agree to allow this office to do an examination of me for further evaluation.

Neuro Emotional Technique (NET) Informed Consent:

The effect of emotions on health is well documented in scientific literature and for over 100 years Chiropractors have attributed emotions to being one of the three causes of misaligned vertebra (a vertebral subluxation). Neuro Emotional Technique (NET) was developed in 1988 to treat vertebra that misalign/subluxate in an acquired reflex to unresolved emotional triggers.

NET is an interactive process that requires the Patient's participation. The Chiropractor is merely the facilitator. The NET process establishes the stuck (unresolved) emotion relating to an original event or experience, by determining weakness in the Patient's acupuncture meridian system and the body's response to particular words.

To release the unresolved emotion, the Chiropractor will contact, or ask the Patient to contact particular body points while the Patient pictures the original event or experience. Needles are NOT used.

NET does not deal with Reality but with Emotional Reality. Any conceivable life experience may be the subject of an unresolved emotion. Such experiences may include but are not limited to those appearing on the bottom of this page.

The Patient is in complete control and can discontinue the treatment if any topic arises which the Patient does not wish to discuss. Occasionally Patient's may become emotional during or after an NET treatment. This is perfectly normal and can be likened to the purging effect of coughing or sneezing. Appropriate referrals to other Health Care Professionals are made where appropriate.

NET is a highly specialised technique requiring significant training. Should you be provided with an opinion on NET by any Health Care Professional who is not trained in NET please contact this Clinic immediately.

I have been provided with a brochure entitled *What Patients Want to Know About Neuro Emotional Technique* or have been recommended to visit and read the NET website: www.netmindbody.com and have clarified queries with the attending Chiropractor.

I give my consent for Chiropractors of Better Balance Wellness to use the skills necessary to examine and care for me each time I consult them.
